Aims, Scope, and Audience

Alpha Psychiatry aims to publish studies of the highest scientific and clinical value, and encourages the submission of high-quality research that advances the understanding and treatment of psychiatry.

Alpha Psychiatry covers a wide range of topics related to psychiatry, basic and clinical neuroscience and behavioral sciences, including diagnostic methods, treatment techniques, and prevention strategies. The journal is interested in publishing original research that addresses important clinical questions and advances the understanding and treatment of these conditions. This may include studies on the effectiveness of different treatments, new diagnostic tools or techniques, and novel approaches to preventing or managing mental diseases.

Alpha Psychiatry publishes original research articles, invited reviews, letters to the editor, editorial comments, debates and expert opinion on guidelines. Conference proceedings may also be considered for publication.

The target audience of the journal includes psychiatrists, mental health workers, neuroscientists and researchers who are interested or working in all fields of medicine.

Article Processing Charge (APC) and Waivers

No fees are requested from the authors during submission and evaluation process. All manuscripts must be submitted via the online submission system, which is available at www.alpha-psychiatry.com.
